JOINT PUBLICATION No. 11

SOME BRITISH BOOKS ON AGRICULTURE, NUTRITION, FORESTRY AND RELATED SCIENCES 1939—1945

List compiled by H. M. Bedington

Price: 3s.

FOREWORD

The Institutes and Bureaux, which form the group known as the Imperial Agricultural Bureaux, have received many requests for bibliographies of recent British books, pamphlets, and similar occasional publications on agriculture, forestry, nutrition and the related biological and other sciences. It was thought to be probably worth while to make generally available one consolidated List from those which they had severally or jointly compiled. Some omissions are inevitable. Notice of those would be welcomed in case this List is revised or a later one published.

During the years covered, the number of copies of books printed was necessarily reduced to a minimum, and many of those included have been out of print for some considerable time.

Reviews and notices of many of these books have appeared in one or other of the abstracting journals of the Imperial Agricultural Bureaux, of which a list appears on p. 37. The occasional publications of the Imperial Agricultural Bureaux are listed on pp. 32—36.
